Subject: Greenidge Generation cryptomining SPDES--Seeking urgent help
Attachments: 8-26-22 Ltr EPA re Greenidge Water.pdf

Good morning, Ms. Wong,

Attached please find a letter sent on behalf of Seneca Lake Guardian, Committee to Preserve the Finger Lakes, Fossil Free Tompkins, and Sierra Club—Atlantic Chapter seeking your urgent help related to water discharge issues at the Greenidge Generation cryptomining facility. I would be happy to connect by video, phone, or email with you or members from your team as soon as possible. We understand the facility may be doing dredging and work on its cooling water intake as soon as next week, so this situation is very urgent.

Thank you,
Jill
